Subject: EPA Superfund Removal Actions

Attachments: ARARs letter for Recycletronics.pdf

Shawn,

As Yolanda mentioned, EPA Superfund will be conducting a clean-up of the Akron Farm site in the spring of 2022. Attached is the draft action memo containing the cost estimates of that removal action. The total EPA costs for this action are estimated to be \$1,921,161.97.

Costs for the clean-up of the G Street site have not been stated in a draft action memo yet, but estimates are that removal action will cost approximately 75% the costs of the Akron Farm site.

Let me know if you need more information on these removal actions. I can always reach out to our Superfund program for more info.

Thanks
